Office Action Summary

Application No.

10/725,417

Applicant(s)

ISHII ET AL.

Examiner

Sameh H. Tawfik

Art Unit

3721

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,6,7 and 18-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,6,7 and 18-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 7, and 18-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshiaki (Japanese Patent No. 09-124200)

Yoshiaki discloses a method for controlling manufacture of a sheet material comprising cutting the sheet material into plurality of sheets of predetermined size (Fig. 4; via web of roller 20 cut into predetermined size); detecting passage of the sheets or the processed products of the sheets by sheet detectors (Fig. 4; via detecting means 68, 70, 72, 47, 76, 75, and 78) disposed at entrance and exit sides of each of the processing operations (Fig. 4; via the sensors are locating at different entrance and exits of different stations) or the processing sections where the sheets or the processed products of the sheets enter and exit the processing operations or the processing sections (Figs. 4); and controlling conveyance (Fig. 4; via controlling means) or manufacture of the sheets or the processed products of the sheets based on results of detection by the sheet material detectors (via different sorting trays for different qualities of the cut sheets); wherein each of the processing operations or the processing sections comprises a branch path for sorting the sheets or the processed products of the sheets being conveyed and the sheet detectors are disposed at an entrance side and exit sides of the branch path (Fig. 4; via sorting sheets based on detecting results at branch path).

Art Unit: 3721

Regarding claim 7: wherein the predetermined operation comprises sorting the sheets (Fig. 4; via 48 and 50).

Regarding claim 18: wherein the operation section includes a sorting section for sorting the sheets and conveying and collecting the sheets into different collection sections (Fig. 4; via sorting trays 48 and 50); the sorting section including a sheet conveyance path with at least one branch gate (via gates 42, 44, and 47); the at least one branch gate operating so as to direct a sheet conveyed thereto to one of different paths therefrom; sheet detectors are disposed at entrance and exit sides of the at least one branch gate for detecting a sheet that passes through or has passed through the at least one branch gate (Fig. 4); and the controlling step includes determining a conveyance status of the sheet based on results of detection by the sheet detectors (Fig. 4; via controlling means).

Regarding claim 19: wherein the determination is made as to whether or not any failure has occurred in at least one of conveyance and sorting of the sheets (via production managing device 180).

Regarding claim 20: wherein the conveyance status of a sheet is determined based on checking at least one of the results of detection by the sheet detectors disposed at the entrance and exit sides of the branch gate (via production managing device 180).

Regarding claim 21: wherein one of the collection sections is disposed together with a counter for counting a number of the sheets collected at the respective collection section at each of terminal ends of the branch paths (Fig. 4; note that it is inherent such managing device is capable of counting the sheets).

Art Unit: 3721

Regarding claim 22: wherein at least one of the paths branched from the at least one branch gate directs the sheet toward a next branch gate (Fig. 4; via gate 42 directs sheets to gate 44).

Regarding claim 23: wherein the manufacturing line is controlled so as to stop conveyance of the sheets based on a determination of a failure (Fig. 4; via by sorting the sheets out of the machine in one of the collections 48 or 50).

Regarding claim 24: wherein the sheet is produced by cutting to a predetermined length a long material wound in a roll (Fig. 4; via out or roller 20); calculating a number of produced sheets based on a length of the material drawn out from the roll, and comparing a number of the sheets collected in the collection sections with the calculated number of produced sheets (Fig. 4; note that such calculations and comparison is inherent for processor or managing device 180).

Regarding claim 25: wherein the comparison between the numbers of the sheets is performed when conveyance of the sheets is stopped (Fig. 4; via some of the sheets sorted on 48 and 50 while means 180 still computing for other sheets).

Regarding claim 26: wherein at least one of wrapping and packaging the collected sheets is carried out to provide wrapped and/or packaged sheets (Fig. 4; via 60); further comprising the step of counting a number of sorted sheets and the numbers of at least one of the wrapped and packaged sheets (Fig. 4; note that it is inherent such computing/processor means 180 capable for counting the wrapped/package sheets 60; via through sensor 78).

Response to Arguments

Applicant's arguments with respect to claims 1, 6, 7, and 18-26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

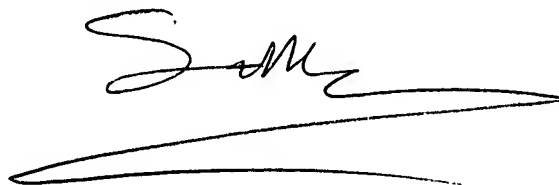

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sameh H. Tawfik whose telephone number is 571-272-4470. The examiner can normally be reached on Tuesday - Friday from 8:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
